State-of-the-Art Production Facilities

We uphold the highest standards in wood pellet manufacturing with modern, efficient, and quality-driven facilities.

Sustainable Sourcing

We source raw materials from sustainably managed forests in Northern Vietnam, ensuring a renewable and eco-friendly supply chain

Advanced Manufacturing

Our state-of-the-art facilities utilize advanced machinery to crush, dry, and pelletize biomass with precision and efficiency.

Strict Quality Control

We implement rigorous quality control measures, including moisture and ash content testing, to ensure premium-grade wood pellets

Reliable & Sustainable Raw Material Supply

Leveraging Northern Vietnam's abundant forest resources for stable, high-quality wood pellet production.

Rich Forest Resources

Located in the heart of Northern Vietnam, we have access to an abundant supply of renewable, sustainably managed raw material chain.

Strategic Sourcing Location

<100 km from Hai Phong Port,
<120 km from Lang Son Border –
enabling efficient export logistics.

Stable Supply Chain

Direct partnerships with reliable suppliers ensure a steady, year-round flow of high-quality raw materials to our facilities.

Eco-Friendly Practices

We adhere to sustainable forestry practices that promote environmental responsibility and ensure long-term resource availability.

Harnessing the renewable power of Northern Vietnam's forests to produce superior wood pellets for global markets.

WHY CHOOSE US

Trusted Partner for Biomass Fuel

VINA WoodPellet delivers exceptional quality, reliability, and sustainability to customers worldwide.

Consistent Quality

Top-quality ENplus A1 certified wood pellets with strict quality control to ensure consistent, high-performance fuel supply.

Secure Supply Chain

Abundant, sustainably managed forest resources and proximity to key ports for stable, long-term material supply and efficient delivery.

Competitive Pricing

Cost-effective solutions with stable, competitive pricing based in the heart of Southeast Asia.

Customer-Centric Service

Premium Export Pellets

High-Quality Wood Pellets for Global Markets

Specifications

Diameter	6mm
Length	10–40 mm
Moisture	≤ 8%
Ash Content	≤ 0.7%
Calorific Value	≥ 4,700 kcal/kg
Density	≥ 1.1 g/cm ³
Certification	ENplus (A1-quality)

Key Features

- High calorific value
- Low ash content
- Minimal emissions
- ENplus (A1-quality)

Applications

- Residential heating
- Commercial boilers
- Pellet stoves

Packaging

- 15kg baks (1 ton)
- 10kg / 20kg bags
- 1 ton

Industrial Wood Pellets

Premium Wood Pellets – Industrial Grade

Specifications

Diameter	6mm / 8mm
Length	10–40 mm
Moisture	≤ 10%
Ash Content	≤ 2%
Calorific Value	≥ 4,600 kcal/kg
Density	≥ 1.1 g/cm ³

Key Features

- High energy efficiency
- Low emission
- Stable combustion
- Eco-friendly (100% natural wood)

Applications

- Industrial boilers
- Power plants
- Heating systems

Applications

- Industrial boilers
- Power plants
- Heating systems

Packaging

Jumbo bag (1 ton)

15kg / 25kg bags

Bulk vessel

BBQ & Heating Pellets

Premium Wood Pellets for Barbecue and Home Heating

Specifications

Diameter	6mm
Length	10–30 mm
Moisture	≤ 8%
Ash Content	≤ 1.2%
Calorific Value	≥ 4,700 kcal/kg
Density	≥ 1.1 g/cm ³

Key Features

- Made from pure hardwood
- Optimal for grilling and heating
- Low moisture for clean burning
- Natural, rich flavor for BBQ

Applications

- 🏠 BBQ grilling
- 🍕 Pizza ovens
- 🏠 Home heating stoves

Packaging

- 8kg Bag
- 4kg / 10kg bags
- 10kg plastic jars

Commitment to Sustainability

-  **Sustainable Sourcing**
Responsible procurement from sustainably managed forests
-  **Renewable Energy**
Utilizing biomass for clean, renewable energy production
-  **Low Carbon Footprint**
Minimizing greenhouse gas emissions through efficient production and logistics
-  **Waste Utilization**
Recycling by-products of production, such as sawdust and wood chips

FSC® and PEFC™
certified products available
